

Inventory IQ: The Smart Choice for Inventory Optimisation

Start Smart with AGR

In today's volatile market, SMBs often struggle with inaccurate demand planning processes, unpredictable supply chains and stock inefficiencies. This is because ERP systems fall short in inventory management, leaving you scrambling through spreadsheets and outdated reports, while suppliers keep shifting their timelines. As you extract your stock data – are you missing clear insights that are readily available?

Leading Inventory Management Solution - **Inventory IQ**

- Plugin to any ERP with either a standard connector or customised integration.
- Monthly subscription including hosting, on-demand support by dedicated success manager, and product updates
- Streamlined setup delivered through 4 SaaS packaging modules, including compulsory base package **Inventory IQ** and additional **PlanPro**, **OrderPro** and **InsightsPro** packages

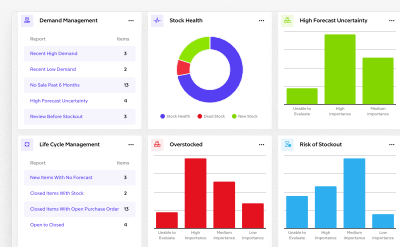

Fortunately, Inventory IQ offers you a smart way to stop fighting inventory fires and start making confident, data-driven decisions for your demand planning, replenishment, and forecasting. With a few clicks, Inventory IQ is installed. No IT headaches, no long training manuals - just proven results.

Seamless, Scalable, Smart

1. Simplified Data Visibility & Reporting

See all your inventory in a single, real-time dashboard highlighting risks before they happen. No more guesswork. With Inventory IQ, you gain a comprehensive dashboard that offers instant visibility into your inventory health. All your reports are in one place, making it easier to analyse trends and act quickly.

2. Smart Forecasting for Demand Planning

Inventory IQ offers powerful forecasting tools to provide accurate visibility into your customer demand. With monthly best-fitting forecast modelling and safety stock adjustments, you can ensure that you are maintaining optimal stock levels all year around.

3. Precise Order Calculations

With Inventory IQ, it's not just about ordering stock—it's about keeping the business running without overstocking or running out of critical items. Instead of spending hours calculating what to order, get instant, optimised order quantities reports that streamline your purchasing process.
