

How Can AGR Help You Now?

Your ERP is a powerful tool handling core business functionality like finance, HR and basic inventory tracking. However, ERPs lack critical tools for optimised supply chain management, especially when it comes to forecasting, ordering and detailed item-level analysis.

Starting Your ERP Migration Journey

Embarking on an ERP migration is a significant undertaking, often spanning 6 to 24 months from start to go-live. Integrating AGR's inventory management software before beginning your ERP project offers numerous advantages that streamline the process, safeguard your operations, and deliver rapid ROI. Here's why:

Simplify Your ERP Project

- **Reduce Complexity:** Adopting AGR before your ERP migration eliminates the need to learn two systems simultaneously. This simplifies the transition, allowing your team to master AGR's inventory optimisation first.
- **Streamline Purchasing:** AGR takes care of purchasing processes during the ERP transition, ensuring business continuity and removing additional layers of complexity.

Ensure Operational Continuity

- **Uninterrupted Supply Chain:** AGR ensures purchasing and inventory management remain consistent throughout the ERP migration, maintaining service levels and preventing disruptions.
- **Protect Stock and Sales Data:** With AGR, your critical sales and stock data are safeguarded, making the transition smoother and more secure.

Optimise Data Before Migration

- **Master Data Refinement:** AGR's tool allows you to address and resolve data issues before migrating to your new ERP, resulting in cleaner, more streamlined data transfers.
- **Seamless Integration:** AGR ensures a complimentary migration to the new ERP once it is live.

Your Everyday Tool For Inventory Management

By choosing AGR as your inventory management partner before your ERP migration, you position your business for success. With simplified processes, uninterrupted operations, and accelerated ROI, AGR ensures your ERP project is less daunting and more impactful. Invest in AGR today to set the foundation for a seamless transition and long-term growth.

Achieve Faster ROI

- **Immediate Value:** AGR's inventory optimisation delivers tangible results quickly, providing significant ROI even before your ERP is fully operational.
- **Cost Savings:** By handling purchasing outside the ERP, AGR reduces the need for consulting days, cutting down on implementation costs.

Enhance Business Confidence

- **Protected Transition:** With AGR, you gain peace of mind knowing that your stock and supply chain are managed effectively during a complex ERP migration.
- **Lifecycle Optimisation:** AGR optimises inventory management throughout the entire ERP change lifecycle, ensuring your business remains resilient and competitive.

Leading Inventory Management Solution - [Inventory IQ](#)

- Plugin to any ERP with either a standard connector or customised integration.
