

Introducing the Lead Time Analysis Feature

Your service level starts with your vendor's performance. Don't let delays cost you by ensuring your suppliers meet the standards your customers expect.

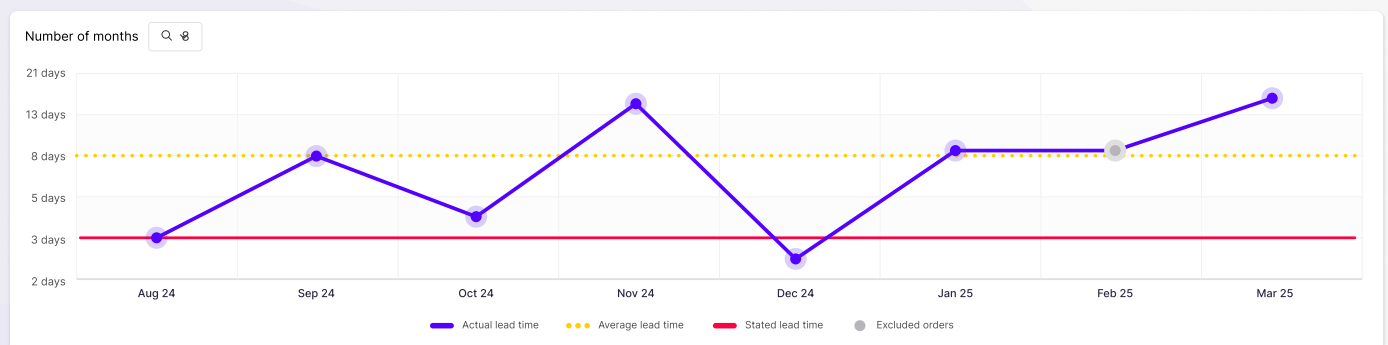

With the Lead Time Analysis feature, you can:

- Quickly identify causes of poor delivery performance (e.g., logistics, geography, supplier issues)
- Take fast, data-driven actions to optimise your supply base
- Move beyond outdated ERP tools, spreadsheets, or static reports

Lead time analysis →

Lead time days	3
Avg lead time	8
Max lead time	47
Min lead time	1
No of deliveries	40
No of purchase orders	40
Deliveries %	55%

This feature provides dynamic, real-time insights to support smarter decision-making, even on the busiest of days.

Benefits of Lead Time Analysis

- Improve forecasting accuracy: Get better order proposals with reliable lead time data.
- Eliminate guesswork: Reduce overstocking and understocking by knowing exactly when to expect deliveries.
- Negotiate better terms: Use performance data to strengthen supplier negotiations.
- Unify your vendor data: Access all your insights in one centralised view.

 [Contact your AGR Rep](#) if you have any questions about the feature today.
